

The complete terrace
system designed for life.

About Raaft®

We make outstanding terraces through creative, versatile systems.

RAAFT®'s intuitive system is powered by a cohesive team of technical consultants, project managers, innovative product designers, construction professionals, and an invaluable support team.

Together, we seamlessly integrate expertise and efficiency to provide you with a comprehensive service tailored to elevate your construction projects.

“Our team is a bit obsessed with delivering quality products, going that extra mile for customers and making every process make sense. We ensure the integrity and superior quality of all our products through our own quality management system.”

Stuart Bowie, Founder of Raaft®

Inspiration

The Spiral

Designed by Bjarke Ingels Group (BIG), The Spiral is an unprecedented work of human-centric design. Featuring a dramatic series of cascading terraces that reach every tower floor, The Spiral delivers light, fresh air, and access to outdoor space, enhancing the health and well-being of your workforce.

For the City's foremost industry leaders, The Spiral is the future of the workplace, a statement of ambition, and an opportunity to stage the next era of growth in the most significant new addition to the City's skyline in years.

Project Completion

November 2022

Inspiration

The Plimsoll Building

The Plimsoll Building was originally completed in 2013, but a full refurbishment to bring it up to current fire regulations required a refresh of its balconies and roof terraces. Raaft® was able to ensure the terraces were designed to achieve the architect's vision and built to both comply fully with regulations and create a long-lasting and relaxing rooftop environment.

Featured Products

Atria® Porcelain Tiles

Support Structure

Structa Floor Structure Panels

What do we do?

We enable design creativity and reduce risk through providing a complete, customisable roof terrace fit-out system, engineered to work together and last for a lifetime.

Raaft® Terrace System

Our intuitive modular terrace system can easily be constructed in a simple three step process.

Step 1

Building a good base

A good quality support structure is key to creating a sturdy, safe terraced area. As roofs are rarely flat or level, our Raaft® system is the perfect solution.

Step 2

Choosing your surface

Our surface range is designed to overcome any design challenge and includes Terrafina Composite Decking, Farrino® Fire-rated Porcelain Decking and Atria® Porcelain Tiles, all of which are available in different finishes to compliment any design.

Step 3

Adding dimensions

A terrace can easily be transformed into a garden with layers of interest and a feeling of permanence by adding planters that are available in a variety of standard and bespoke options.

Support Structures

Building a good base

- Non combustible adjustable pedestals
- Aluminium joist system
- Floor structure panels
- Accessories

Surfaces

Choosing your surface

- Atria® Porcelain Tiles
- Farrino® Porcelain Decking
- Aluminium Decking

Planters & Benches

Adding dimension

- Modular Planters
- Bespoke Options
- Bench Systems

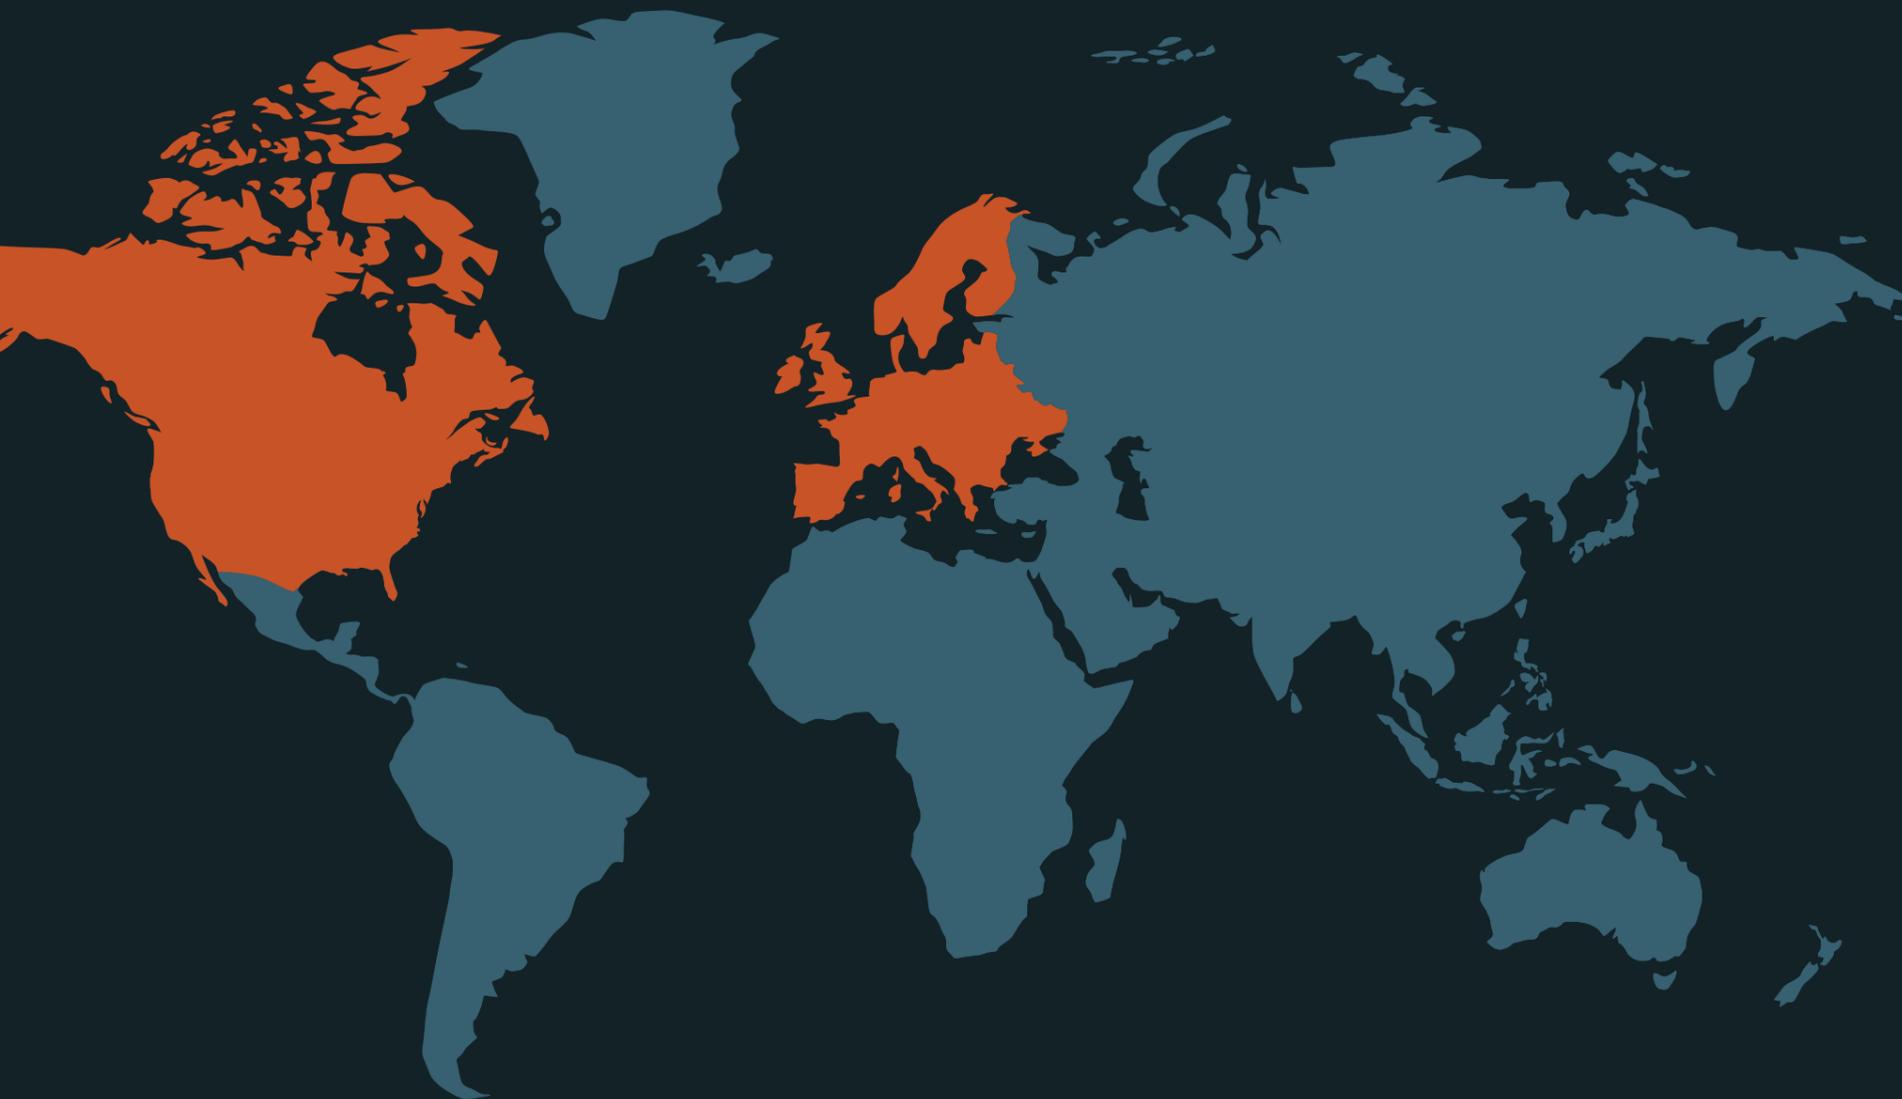

Furniture

Adding depth

- Flow modular system
- Furniture collections
 - Stool
 - Bench
 - Table
- Ambit integrated seating
